HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on June 30, 2009 has been entered.

EXAMINER'S AMENDMENT

It is noted that the Examiner's Amendment from the previous Notice of Allowance mailed April 29, 2009 still stands.

Allowable Subject Matter

It is noted that present claims 1, 3, 5-7, 13 and 14 were previously allowed as set forth in the Notice of Allowance mailed April 29, 2009,

In light of filing a proper RCE on June 30, 2009, prosecution of pending claims 1, 3, 5-7, 13 and 14 was reopened.

It is noted that present claims 1, 3, 5-7, 13 and 14 remain allowable over the closest prior art of record Senda et al. (US 5,990,417) for the reasons of record as set forth in the Notice of Allowance mailed June 2, 2009 and restated below.

The following is an examiner's statement of reasons for allowance:

The following is an examiner's statement of reasons for allowance: The closest prior art Senda et al. US 5, 990,417 teaches an electromagnetic noise absorbing material and relationship of relative magnetic permeability (Col. 1, Line 24-34) and further discloses an imaginary part of a relative magnetic permeability in the band of a few hundred MHz (Col. 24, Line 62-65). However, Senda '417 fails to teach, suggest or render obvious a complex magnetic permeability in the GHz range and an imaginary part L of a complex magnetic permeability in the GHz range.

Watanabe et al. US 6,921, 573 teaches electromagnetic noise suppression in the GHz range but, teaches a preferred thickness of several microns (Col. 4, Line 43-47).

Neither reference disclose a mixed structure of (1) a crystal lattice of magnetic material; (2) only binding agent; and (3) mixed phase of binding agent and magnetic material where the magnetic material is not crystalline.

Further, Applicant's IDS filed June 30, 2009 has been considered. The present claims are allowable over the references presented.

The Japanese Office Actions are directed to broader claims than those of the instant application. All documents presented in the International Search Report for PCT/JP2004/002104 where previously reviewed in previous IDS documents.

The references of the IDS filed June 30, 2009 disclose electronic noise suppressors with either a noise suppressing material on the surface of a resin material or uniformly blended in a binding agent. They do not teach or suggest an electromagnetic noise suppressor having a complex magnetic permeability in the GHz range and an imaginary part L of a complex magnetic permeability in the GHz range, such that a complex magnetic permeability at 8 GHz which is higher than an imaginary part of complex magnetic permeability at 5 GHz and having a thickness range from 0.005 to 0.3 microns. Thus, it is clear that the references of the IDS filed June 30, 2009 do not disclose or suggest the present invention.

In light of the above, the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
